Q: Connect strings to variables with a link I would like to make a list of friends using Linking. In my Database I have : friends - example Id: 1, 2, 3. Then, if I click on any friend in the list, I should go to a new ViewController with this friend's ID. I have 2 tables (friends & app_code) what I did is something like this in my TableViewController: public class FriendListTableViewCell: UITableViewController {
override func viewDidLoad() { super.viewDidLoad() tableView.register(UINib(nibName: "FriendCell", bundle: nil), forCellReuseIdentifier: "friendCell") tableView.dataSource = self tableView.delegate = self }
var appCode = Database(dbPath: "app_code.sqlite").db var friendsList = Database(dbPath: "friends.sqlite").db var FriendsItem: String var friendsList = [String]() var myContoller: UIViewController!
override func viewWillAppear(_ animated: Bool) { super.viewWillAppear(animated) for _ in 0..
