Fun playing co-op. Also enjoyed the endurance missions a lot. Wish there were more of a variety of stages and enemies in those levels. Worth the price.. I was sipping my coffee, as I do first thing in the morning, when a mysterious chest appeared on my doorstep. Inside its solid gold crust lay a satin interior, and nestled on top was a golden ticket. Reaching in, I picked it up – It was from my editor. It read, “Legendary Gary – Get it done by the 19th!” followed by a secret code.

I couldn't believe my luck, I'd wanted to review the game since I first seen it. The artwork felt like it came from a Heavy Metal magazine, the music was somehow reminiscent of the Talking Heads, and the gameplay looked like a cross between adventure and RPG. I was elated. Looking down at the elaborate packaging that my prize arrived in, I realized one thing was for certain...

Read the rest of the Review [here](#). This is one of those great simple games. It has a story and poker/yahtzee card game that allows you to battle apponents as you match 5 cards. It also spices it up with differnt types of power cards that you can collect and add or exchange in your deck in between each fight. I love this game.. Tons of wheel options now! Something for everyone!. GET THIS TO 350 REVIEWS

Okay but not that fun. I got this on a Humble Bundle, and having used it for five minutes, I was blown away by the quality of this piece of software. I have zero artistic talent, yet I've created that animation on the tutorial with no problem, and even made one myself. It's amazingly easy to use and also extremely fast to get nice results.

If you're making a game and would like to use modular animation, buy this. It's just amazing.. A very nice game but sadly abandoned years ago with a couple of game-breaking bugs. For example it may happen that population begins to die out and due to bugs there's no way to stop it = game over in few minutes even though you're close to finish.. Recommended with caveats:

- you cannot save games mid-level
- you cannot remap key bindings

In Creeper World 3, you can save games and remap keys. This makes experimentation and optimization more efficient and enjoyable. Sadly, in the original Creeper World, you can do neither. Therefore experimentation is practically impossible and any mistake can be very costly. This probably only matters if you are worried about efficiency and competing against other scores on the leaderboards.

I have spent hours optimizing my strategy on a single map in Creeper World 3. In Creeper World, I just cannot be bothered.

So... I recommend and enjoy Creeper World 3 much more than Creeper World 1. But if you are a completist, it is fun to see what came before Creeper World 3.. This dlc just farts right up your face when you've gone through 30 minutes long of time patrols and then the supreme kai of time just says "let's have some tea" and that's what you get, one unfinished storyline, 3 PQ and 2 masters, they could as well not release that at all, even if they give us 3 DLC, if they're all like this one, they're not even worth the price of a single one.. One of my favourite real-time strategy games. Shallow but deep at the same time. Difficult while easy to learn. Would recommend.. Turn based Nuclear Throne. Great daily runs.
